

Pneumoconiosis

- **Pneumoconioses** are a broad group of lung diseases that result from inhalation of dust particles. It is therefore considered part of the spectrum of inhalational lung disease.

Fibrotic

- coal workers pneumoconiosis (CWP)
- asbestosis
- talcosis
- silicosis
- berylliosis
- mixed dust pneumoconiosis
- hard-metal pneumoconiosis,
 - e.g. tungsten, cobalt
- giant cell interstitial pneumonia

No Fibrotic

- pulmonary siderosis
- pulmonary baritosis
- pulmonary stannosis
