

# *Intersection syndrome*

- Painful condition of the forearm and wrist.
- It can affect people who do repeated wrist actions, such as weight lifters, downhill skiers, and canoeists.
- Heavy raking or shoveling can also cause intersection syndrome.

# *Intersection syndrome*

- Two muscles that cross over the wrist tendons control the thumb.
- *Extensor pollicis brevis* and the *abductor pollicis longus*

# *Intersection syndrome*

# *Intersection syndrome*

- Enhancement predominantly in interval between first and second extensor compartment tendons (*arrowhead*)
- Very likely reflecting inflammation from focal friction and adventitial bursitis.
