

Frontal sinus

- Absent at birth, finish in 2nd decade
- Essentially anterior ethmoid cell
- Drainage is variable – Mid meatus
 - Ethmoid infundibulum
 - Frontal recess
- Usually asymmetric, may be septated
- Frontal recess – drains frontal sinus – best seen on sagittal reformations

Frontal recess (AKA nasofrontal recess, duct)

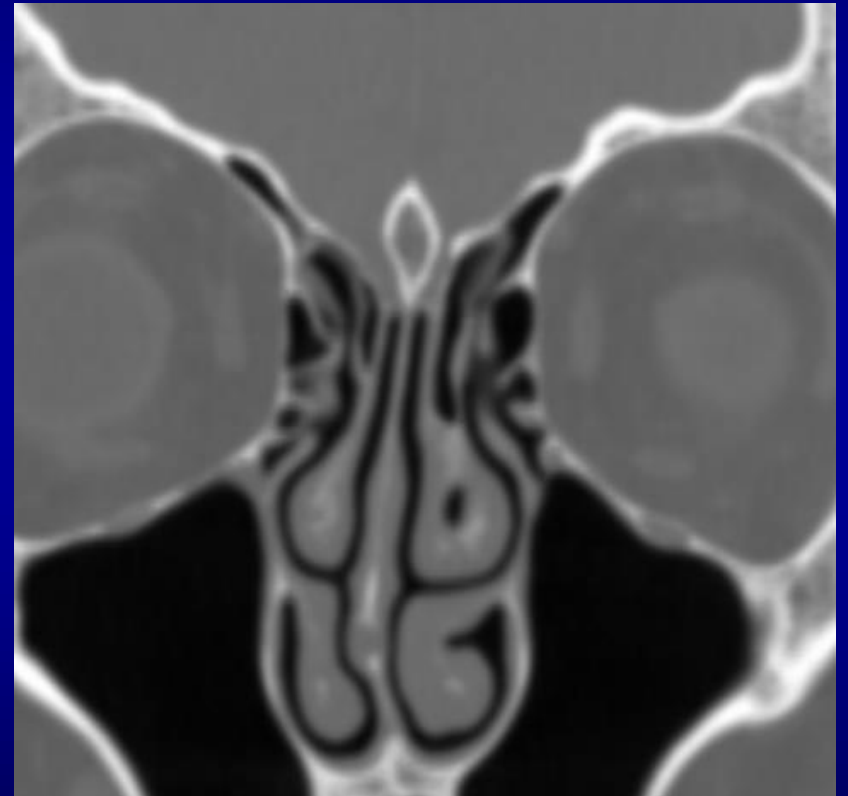

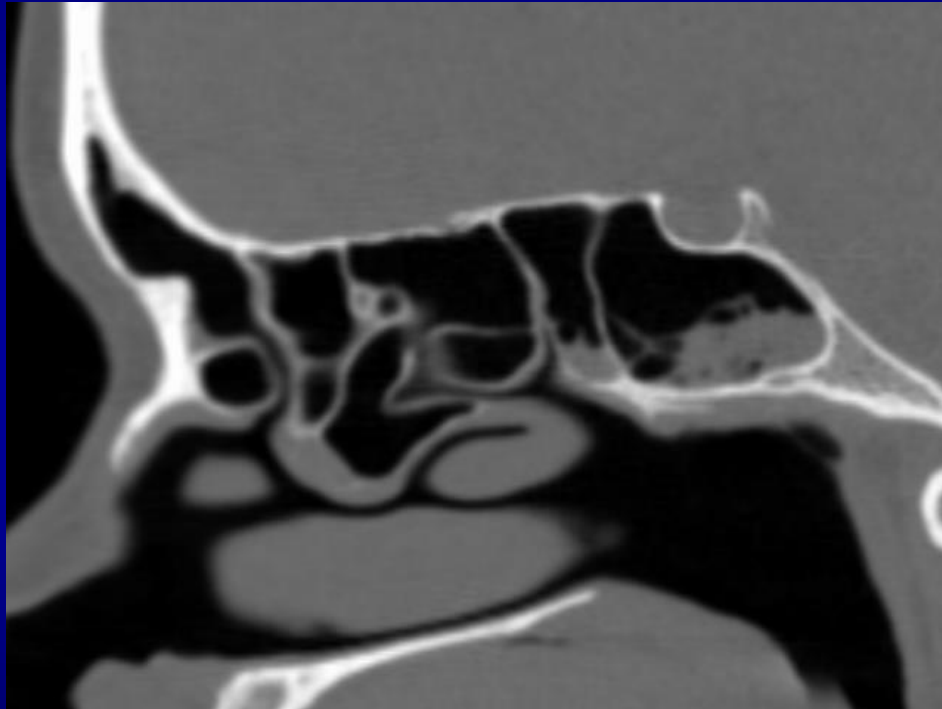

Frontal Recess

- Anterior
 - Agger Nasi & Frontal cells
 - Posterior
 - Ethmoid air cells
 - Bulla, Suprabullar, Frontobullar, Supraorbital
- ⑩ → Middle Meatus

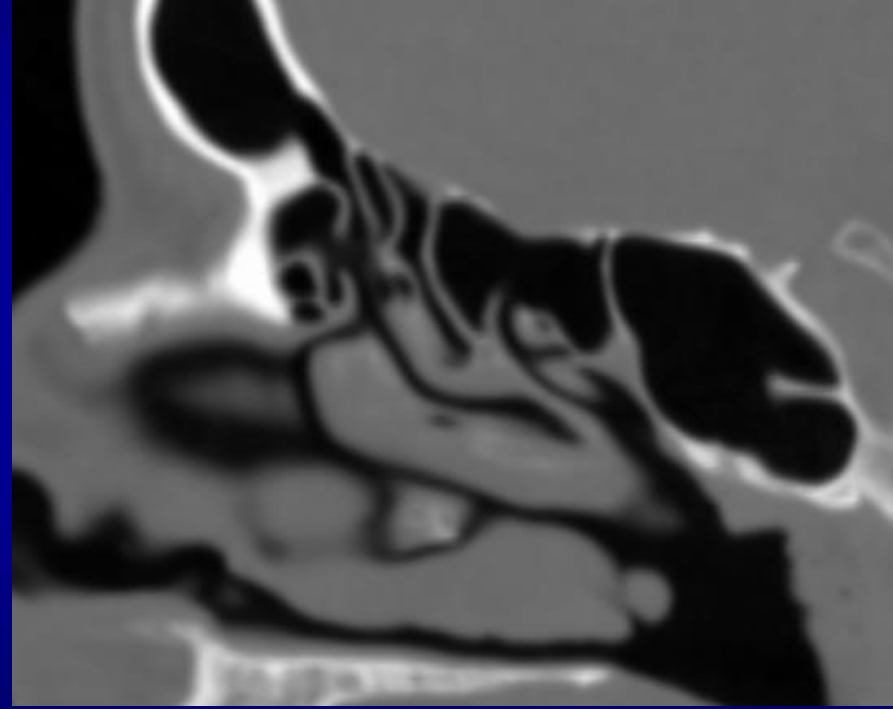

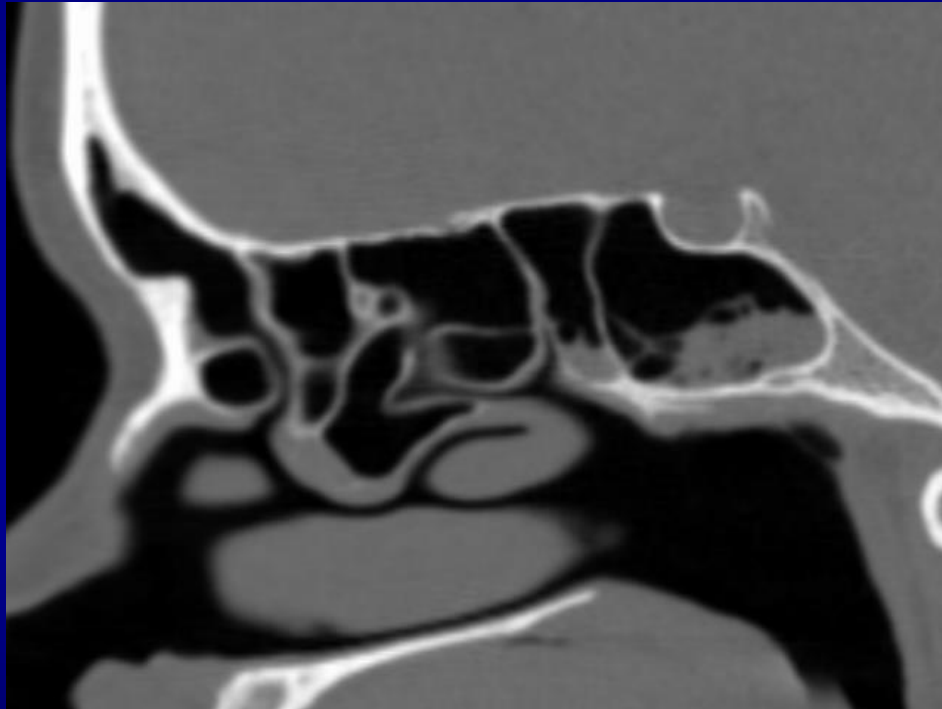

Frontal recess

Frontal cells – above agar nasi
