Dural ectasia

- Ballooning or widening of the dural sac which can result in posterior vertebral scalloping and is associated with herniation of nerve root sleeves.
- Present with low back pain or radicular pain in the buttocks or legs. Pain may be accompanied by leg weakness or urinary incontinence.
- Other associations include <u>spondylolisthesis</u>, <u>scoliosis</u>, vertebral erosions, and vertebral fractures.
- There is also an increased incidence of anterior sacral meningoceles which may present as an abdominal mass.

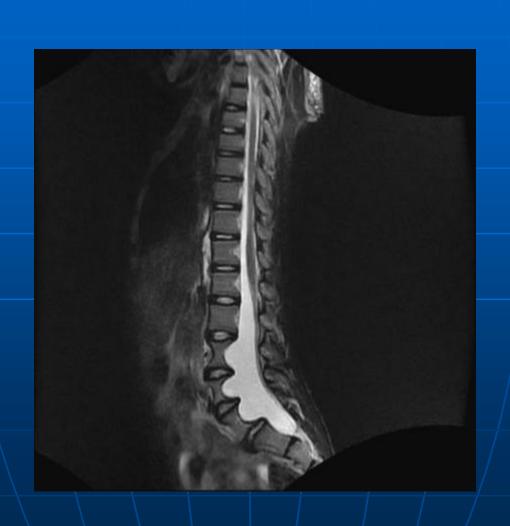

Dural ectasia

Causes

- 1. Ankylosing spondylitis
- 2. Marfan's syndrome
- 3. Neurofibromatosis
- 4. Ehler-Dantos syndrom
- 5. Homcytinuria
- 6. OI
- 7. trauma
- 8. post surgery
- 9. tumors
- 10.scoliosis
